

Info Integration of VC soundbars

→ UC Display column_W6

Height adjustable, multifunctional and price-oriented,
for 50"-80" displays

W6 M

W6 L

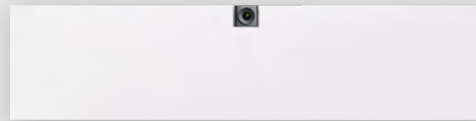

In its standard versions, the W6 modular system offers perfect prerequisites for the integration of VC soundbars.

With bezel plates of different heights (in heights of 10/20 and 30 cm – list price 220 € to 330 €), the W6 allows for the perfect optical and functional integration of common VC sound-systems below the display. The W6 is sustainably variable in terms of display and integration height.

→ Media column_W8

With generous storage space, also mobile and dual,
for 55" - 98" displays

W8 M

W8 L mobile

The Media column_W8 offers on the one hand the perfect integration of classic VC cameras – on the other hand the option to perfectly integrate VC soundbars (below the display) – especially for larger systems.

In most cases, an individually milled MDF bezel plate painted in furniture color replaces the standard fabric speaker cover. If necessary an appropriate mounting device is also part of the solution (list price 390 €).

Perfect integration of UC and VC soundbars

Practical examples

W6 M, freestanding, with Logitech Meet Up in 20 cm bezel.

W8 L, mobile with POLY X50 in custom bezel.

W8 M², wall-mounted with AVER VB 343 in custom bezel.

W8 M, mobile with POLY X30 in custom bezel.

W8 XL, mobile with Crestron Flex UC-SB1 in custom bezel.

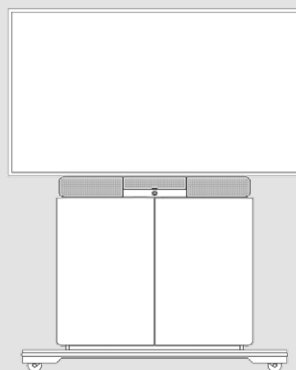

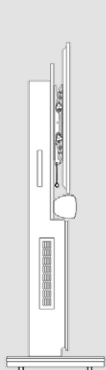

W8 XL², wall-mounted with Cisco Room Kit Plus in custom bezel.

Individual solutions

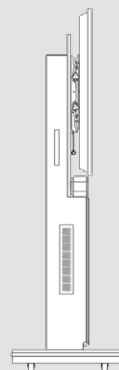

For example for Fohhn Scale-Bar / Crestron UC-SB1-CAM

W8 M with custom body adjustment / milling for a Fohhn Scale Bar

W8 L with custom body adjustment / milling for a Crestron UC-SB1-CAM

In addition to the standardized integration options, individual adjustments to the body can also be made for "extra-wide" VC soundbars, as these drawings show. (additional cost approx. 10% of the respective furniture price).
