# The Triton-Conferencing Centre: Representative room solutions with professional integrated media technology for effective meetings

## Project requirement:

Triton is an international holding company, which is concentrating at sustainable investments for mid-sized companies.

For the newly build conference- and meeting level in Frankfurt am Main, with 9 individual sized rooms, it was about the development and implementation of smart media furniture.

This meant the former developed technology concept of DEKOM AG had to be included – with high requirements at technical functions, especially respective for video conferencing.

Not least of all, the expectations of achieving an representative atmosphere, with a simultaneously solid and enduring impression.

Individual Media wall W4 with 95" Display  
as well as integrated linear speakers, subwoofer and video conference system

“

*Holzmedia understood perfectly the need to develop and build furniture individually based on the planned media technology of DEKOM.*

*Especially pleasing for us was the professional and proactive joined-up thinking approach of Holzmedia, along with perfect coordination of the interface furniture/technology between Holzmedia and DEKOM. This includes the project planning as well as the project realisation.*

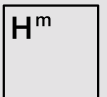

*We are very pleased with the overall result and highly recommend Holzmedia.”*

C12 Conference table with W8 Media column,  
wall mounted with 65" Display

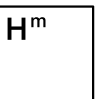

C1 Conference table with W8 Media column, wall mounted  
with 84" Touch display and videoconference system

**Next page:**

Big conference room with C1 Conference table  
for up to 32 persons, W4 Media wall incl. 95"-  
Display, speakers and video conference system  
as well as two W8 Media columns, mobile with  
55"-Display

Holzmedia

“

*The new rooms are technically functional and representative as well as solid and sustainably equipped.*

*Complementing our general planer VEDACON, we experienced Holzmedia as a very committed, joined-up thinking and highly professional consultant across all development stages of the overall concept, as well as during the installation as a constantly flexible and professional acting partner.”*
