

Holzmedia @ Financial Services Provider

Referenzreport 2-2016
Hiscox Ltd.

Holzmedia

Versatile media furniture – individual, movable and with high expectations of design and functionality

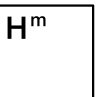

Project requirement:

At first it was just about assembling the newly build construction in York (northern England), for Hiscox a British insurance group.

At the end the main challenge was to create flexible and mainly movable as well as representative media furniture including the integration of Cisco-videoconference system by Hiscox's media technology partner.

Customized media column, movable, for Cisco. Videoconference system MX800 with 70" Display

Holzmedia

Upper row: Movable digital signage columns with 2 x 55" displays each as information panel for employees.

Mid row: Media furniture for Cisco-conference system MX800=70", movable and MX200 = 42" movable and wall mounted.

Lower row: Mobile individual solution with 95" display as well as integrated Cisco videoconferencing technology, to left as column – to the right as impressive Media caddy at reception area.

Hiscox, York

“

The Holzmedia furniture we have chosen, is an excellent complement to our striking new building in York.

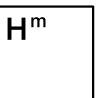

Holzmedias work was carried out efficiently and effectively, with on-site installation – which included a range of 40" to 98" presentation and conferencing screens – taking just one week.

I would have no hesitation in working with Holzmedia again.”
