Rooms for good communication – local and global

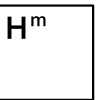

Project requirement:

Stratasys, a global player in 3D printing, with plants and customers world-wide.

It was about representative as well as functional fitting of altogether 6 different sized rooms. With high demand on contemporary and cost efficient communication – in house as well crosstown and transnational. With optimal handling of video conferences and easy to use technology.

Media Wall_W4 with integrated video-conference technology and 55"-Doubledisplay.

Conference table_C1 in WhitePlex finish and integrated media- and dataplug technology.
