

LED Media Wall_W9
Universal and impressive

The W9 – a furniture system made for the integration of LED screens

The LED Media Wall_W9 impresses with its representative design and its thought out to the last detail functionality, coupled with unsurpassed manufacturing quality. Unmistakably Holzmedia - MADE IN GERMANY.

Four basic configurations ...

1. W9 base module*

AV-cabinets with doors and side panels.

Prepared for the accurately fitting integration of LED screens.

3. W9 with speaker cabinets

AV-cabinets with doors.

Lateral speaker cabinets with fabric covers.

Prepared for the accurately fitting integration of LED screens as well as line source speakers and sub-woofers.

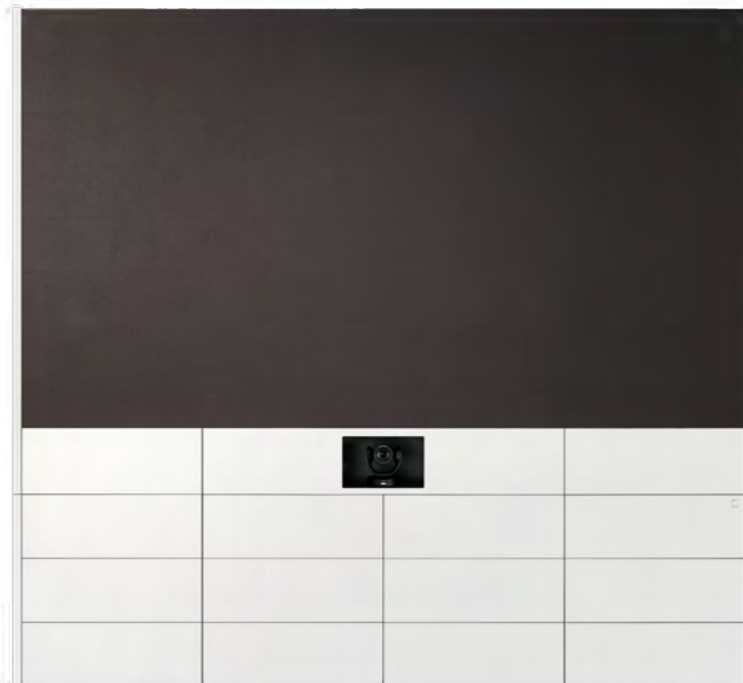

2. W9 with technology level*

AV-cabinets with doors and side panels.

With a technology level for VC integration.

Prepared for the accurately fitting integration of LED screens and VC-cameras/VC-soundbars.

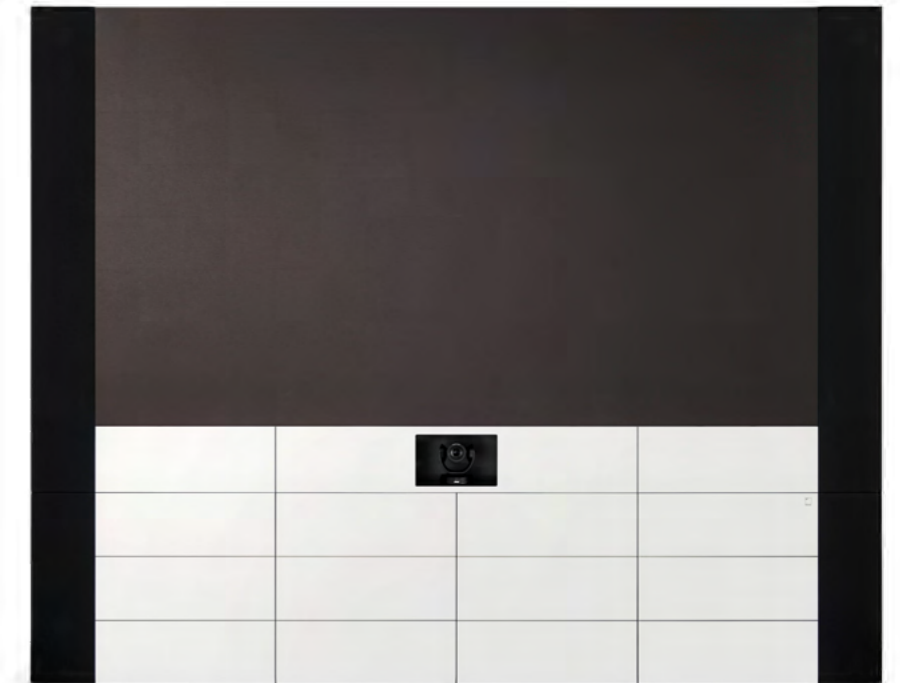

4. with technology level and speaker cabinets

AV-cabinets with doors.

With a technology level for VC integration.

Lateral speaker cabinets with fabric covers.

Prepared for the accurately fitting integration of LED screens as well as line source speakers and sub-woofers.

* optionally with fabric covers for the integration of small speakers, in the top left and right outside doors or in the technology level.

Wall-mounted or mobile ...

The W9 graces any room with its timeless aesthetic, which is underlined by the custom-fit integration of the LED screens and cameras. Cabling and media-related components remain invisible.

Since the load of the heavy screen is carried by the furniture, no wall reinforcement is necessary.

The mobile version with base plate and high-quality castors can be positioned flexibly in the room – even in front of glass walls, window fronts or walls to which it is not possible to attach.

Four standard sizes
for LED Screens from 108" to 165" ...

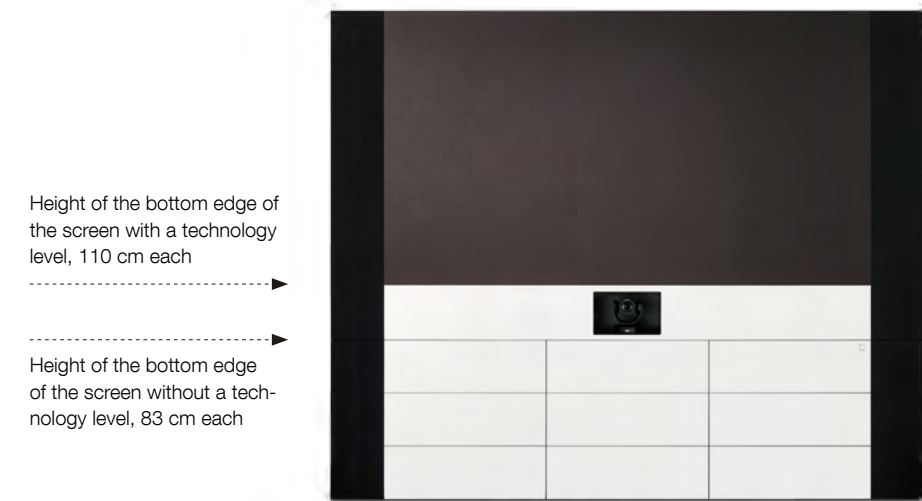

LED Media Wall_W9-110 for screens 108"- 110"

LED Media Wall_W9-146 for screens 136"- 146"

LED Media Wall_W9-165 for screens 162"- 165"

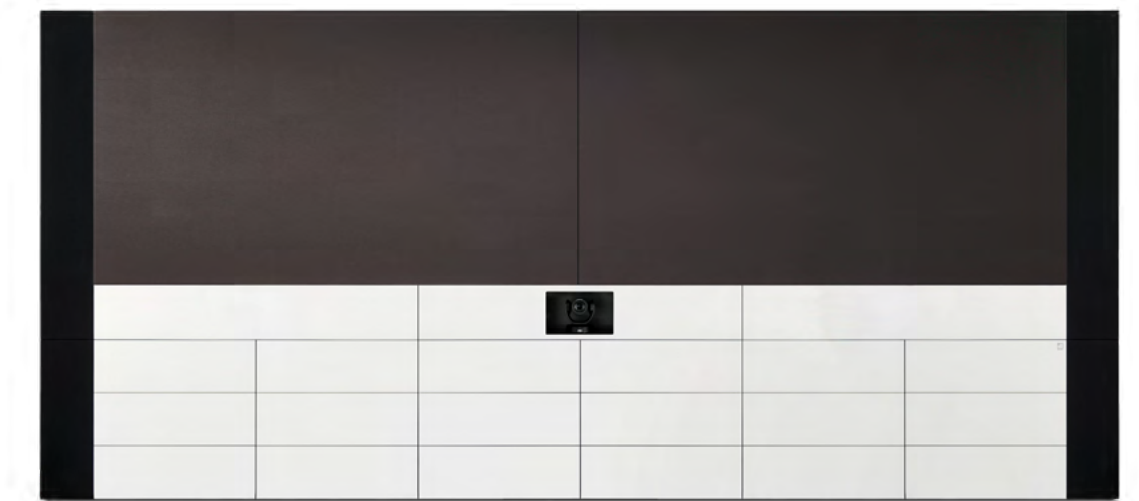

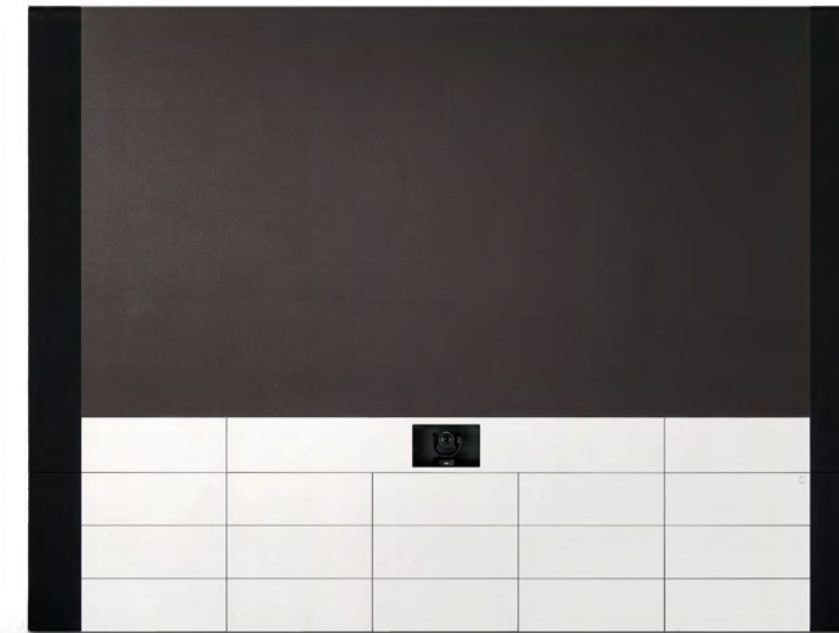

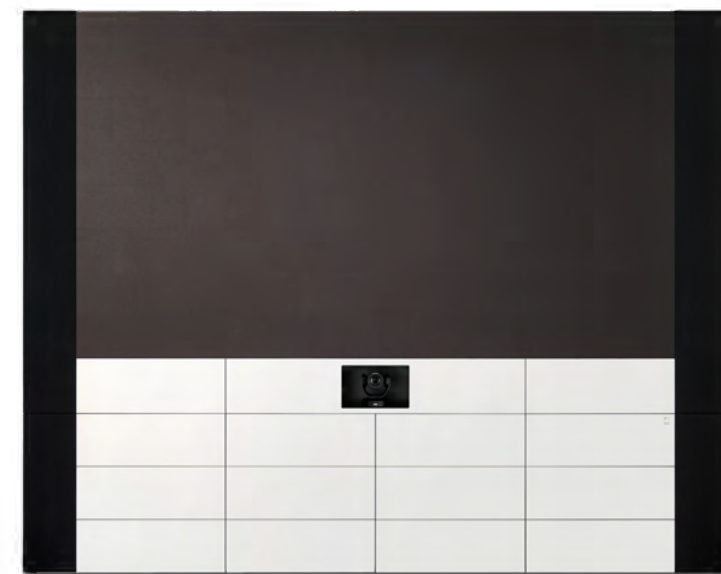

LED Media Wall_W9-110² for screens 2 x 108"- 110"

Wall-mounted

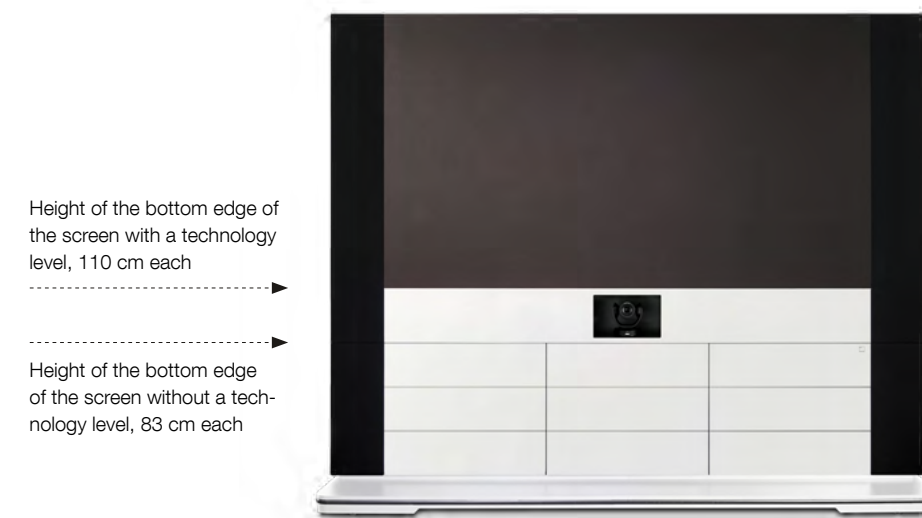

Height of the bottom edge of the screen with a technology level, 110 cm each

Height of the bottom edge of the screen without a technology level, 83 cm each

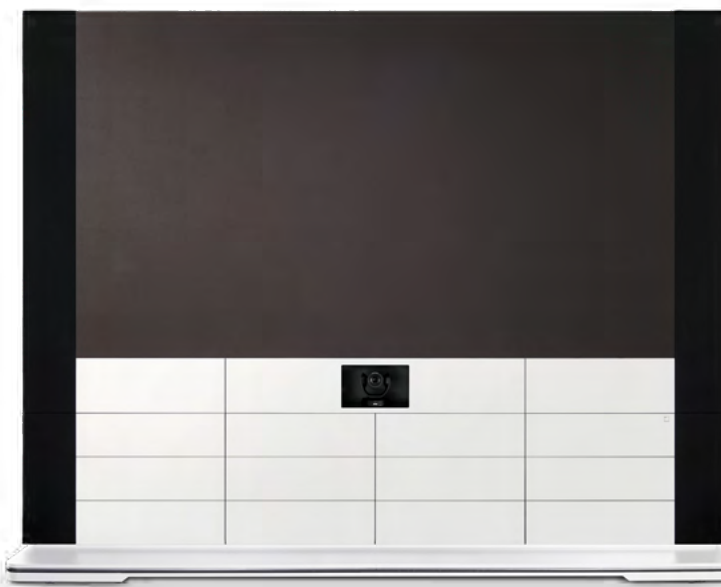

Mobile with a base plate

Height of the bottom edge of the screen with a technology level, 110 cm each

Height of the bottom edge of the screen without a technology level, 83 cm each

The W9 system allows for flexible equipment with video conferencing technology as well as with speaker

systems of different sizes/power as well as various other options.

Surface finish:
Cabinets melamine, MDF doors and sides with structured lacquer.
Speaker cabinets covered in acoustic fabric, black.

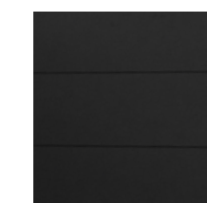

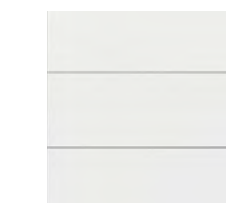

Passively ventilated storage space.

The LED screens are mounted using the appropriate brackets provided by the screen manufacturer.

Options

- ① Lock for doors
- ② Extra shelf for technology compartment

Colors:
arctic white or
lava black

Multiple options for the integration of VC technology and loudspeaker systems

... with functional and well thought-out details

Combined camera/speaker compartment and bezel for VC soundbars

Lateral VC cameras can also be integrated in a speaker cabinet expanded by 12 cm.

The height is variable and is adjusted in the context of speaker integration.

The lateral speaker cabinets are completely covered with acoustic fabric and can be opened over the entire surface.

The upper part is designed for housing line source speakers – the lower part, behind the lower doors, for subwoofers on both sides.

As an alternative to a ptz camera, VC soundbars can also be integrated in the technology level. The configuration can be changed later thanks to custom bezel plates.

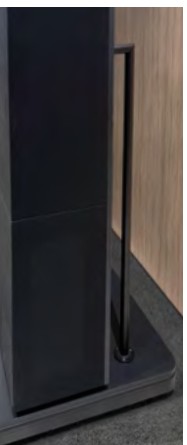

The panels of the technology level can be opened for perfect accessibility.

The AV-cabinets behind the doors provide well-ventilated storage space, e.g. for additional technology.

Top: The mobile version of the W9 comes with a finished backside. The sturdy handles and high-quality castors allow for comfortable moving in spite of its weight.

Left: An optional 4U 19"-rack (pivoting and extractable) for easy technology maintenance.

Individually scalable for screens of any type and size

A freestanding 136" LED Media Wall in arctic white, custom-made for a board meeting room, with an integrated Cisco VC system (as well as loudspeakers in the ceiling).

Individual 220" LED Media Wall in an auditorium with lateral speaker cabinets and a matching Holzmedia Lectern_X3, in lava black.

The W9 offers a wide range of possibilities for the ideal configuration of LED walls

	W9 base module	W9 with technology level	W9 with speaker cabinets	W9 with technology level and speaker cabinets	Screen size/weight Screen mounting	External dimensions (W x D x H)	Dimensions for technology integration (W x D x H)
W9-110, 3-door					For LED screens from 108"-110" max. screen weight: 180 kg Mounting area: 2450 x 1380 mm*	Base furniture: approx. 2530 x 320 x 2200 mm* Base with technology level: height approx. 2470 mm* Base with lateral speaker cabinets: Width approx. 3050 or 3290 mm*	3 cabinets, inside each 770 x 270 x 730 mm* Technology level, internal height approx. 230 mm Speaker cabinets, internal width approx. 180 mm (or with integrated VC cabinet, inside about 300 mm)
Wall-mounted							
Mobile with a base plate					max. screen weight: 180 kg Mounting area: 2450 x 1380 mm*	Base furniture: approx. 2530 x 350/950 x 2200 mm* Base with technology level: height approx. 2470 mm* Base with lateral speaker cabinets: Width approx. 3050 or 3290 mm*	3 cabinets, inside each 770 x 290 x 620 mm* Technology level, internal height approx. 230 mm Speaker cabinets, internal width approx. 180 mm (or with integrated VC cabinet, inside about 300 mm)
W9-146, 4-door					For LED sceens from 136"-146" max. screen weight: 250 kg Mounting area: 3240 x 1840 mm*	Base furniture: approx. 3330 x 320 x 2650 mm* Base with technology level: height approx. 2650 mm* Base with lateral speaker cabinets: Width approx. 3850 or 4090 mm*	4 cabinets, inside each 720 x 270 x 730 mm* Technology level, internal height approx. 230 mm Speaker cabinets, internal width approx. 180 mm (or with integrated VC cabinet, inside about 300 mm)
Wall-mounted

Wall-mounted							

* Dimensions are individually adapted to the respective LED screen

Minimalist and timeless

With its clear design, the W9 also impresses in historical settings.

Here it was decided to use the mobile version, as there is no possibility of mounting on the protected walls of this heritage building.

In addition, flexible placement in the large hall was required.
