

# Display Caddy\_X5

# Mobile display cart

## Representative and functional

### Display Caddy\_X5

Mobile display cart for preview monitors on stages as well as within large table installations. It impresses with its timeless, representative design, without visible cables all around.

Completely finished with structure lacquer. Colors: arctic white, lava black.

The display is mounted via integrated holes in the Vesa standard, directly on the display board, without a supplementary TV mount.

The body offers storage space for technology integration as well as invisible cable routing. The door can be equipped with a lock on request.

The tilt of the display is continuously adjustable (from 10° to 30°) by up to 20 degrees.

A bracket for positioning a PTZ camera is optionally available.
