

Media furniture for complex communication tasks – top-grade design and functionality

Project requirements:

Komatsu Germany GmbH is part of the international, Japanese-based Komatsu corporation, one oft he world's leading manufacturers of construction equipment. The challenge for the new building of the technology center in Düsseldorf lay in implementing a multi-layered concept of different communication tasks in harmony with the modern architecture of the building.

From a video wall in the lobby and different-sized conference and meeting rooms to a special telepresence room. The technological design and the project management was carried out by CANCOM GmbH, Langenfeld. They chose Holzmedia as competent partner for the media furniture, in order to satisfy the customer's high expectations for obtaining a solution with representative appeal.

Slim Video wall with 4 x 55" displays, perfectly integrated into the highly representative lobby.

Holzmedia

Large conference and training room – with mobile, height-adjustable Media furniture_S1 XL and an individual module for wall placement of the videoconference camera below a large projection screen.

Holzmedia media furniture is a perfect complement to the overall appearance of our new building. And it is a great support for the distinct functions of the different rooms. This becomes very clear when doing interactive work on our new touch-screen displays or professional videoconferencing.

We are excited about the final result!"

Kai Schychowski
General Manager ICT,
Komatsu Germany GmbH
