

Conference table\_C12  
Modern and versatile

# Clear, pristine and light

Cable routing along the foot, behind a magnetic metal blind. Or through a central cable housing with room for retractors and technology, with easy access.

Data connector panels, on demand, here frameless and flushy integrated.

Cable guide for the permanent connection of mics, phones or remote control panels.

Chamfered edges, elegant and light.

## Innovative and convincing

The Conference table\_C12 with its clear design is the ideal solution for any meeting room and all requirements.

It combines perfectly with Holzmedia media furniture and impresses with its legroom, good value and a host of excellent details.

## Well thought out

The chrome feet with their interior leather lining offer a pleasant feel and a design that combines well with most conference or office chairs.

Invisible cable routing, either on each foot or through a central cable housing, ensures a clean look – a fabric blind option is also available.

Data connector panels and cable guides can be integrated anywhere to ensure power supply and connections for the devices needed.

A truss-rod connection system between elements makes for high stability.

# Various shapes and surfaces

## Universal

With its large selection of sizes and shapes the C12 can be adapted to nearly all room situations and meetings of 6 or more people. Standard options include 6 shapes, each one available in different sizes, and 5 surface finishes.

With the trapezoid, triangle and V-shapes the C12 offers special formats for videoconference rooms.

There are also numerous possibilities for customization.

**Rounded boat shape** · 3 sizes for 8-14 people – further sizes for 16 people or more are available

**Rectangle shape** · 3 sizes for 8-14 people, further sizes for 16 people or more are available

**Trapezium shape**, especially for longish videoconference rooms · 3 sizes for 6-14 people

**Triangle shape**, especially for square videoconference rooms · 3 sizes for 6-12 people

**V-shape**, specially for videoconference rooms with double display · 4 sizes for 10-16 people

**Round shape** · 2 sizes for 6-9 people

# Specially designed for videoconferencing

## Special shapes – logical and consistent

During a videoconference all participants should be captured well by the camera, and all should have a good view of the screens. That is why we also make the C12 in a trapezium shape, for longish rooms – in a triangle shape, for square rooms and in a V-shape for arrangements with a double display.

These special formats ensure optimum communication in all meeting and conference situations.

These models naturally include the other advantages and features of the C12 – especially the generous leg room for long meetings.

## WhitePlex – for perfect presence

The elegant and at the same time robust WhitePlex surface noticeably improves the quality of a videoconference.

The finely textured, matte and non-glare surface of the cast resin increases the amount of diffuse light in the room, even if the lighting conditions aren't perfect.

This property ensures optimum illumination of participants' faces and thus reinforces their presence.

The elegant appearance of a WhitePlex table adds an exclusive touch to any room.
