# Holzmedia Media Columns – timeless, functional, and adaptable for different kinds of rooms

Left: seminar room with large version, 3 doors for 2 x 84" displays, Zurich.  
Right: freestanding media columns across corner in front of glass walls, Zurich.

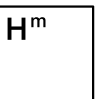

## Our mission:

As part of a standardization project extending across locations the independent consultant hmpartner were asked to design a videoconference concept with EY-specific media furniture.

For the development of correspondingly representative as well as functional media columns hmpartner turned to Holzmedia, based on good experiences and our expertise.

The requirement was furniture for interactive 65" as well as 84" dual displays with integrated JBL speaker and a Panacast VC camera between the displays – each version perfectly prepared for invisible technology integration.

The result is highly functional EY-standard videoconference furniture, which also ensures rapid, time-saving installation in the highly frequented rooms of the different locations.

Holzmedia

Large conference room with large version, 3 doors for 2 x 84" displays, Zurich.

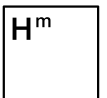

“ We look back with satisfaction on an all around successful project: professional planning and very flexible regarding our individual requirements for larger and freestanding solutions. The installation in our rooms was carried out very competently and “silently”.

Moreover, we had to invest surprisingly little time in this rather complex project. And the new functionality and elegance of our rooms confirm the usefulness of our investment”.

**Peter Fehlmann**

Associate Director, EY Zürich

Holzmedia

Top: one of 11 VC conference rooms. With „VC-standard-furniture“, 2 doors for 2 x 65“, Hamburg.

Right: VC camera, perfectly embedded in the fabric blind between the displays.

Top: freestanding media column with floor plate and side covers for the displays.

Right: lockable, ventilated body for invisible technology integration.

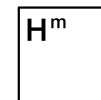

“ *And added value for us – besides the convincing functionality and quality of the Holzmedia furniture – was the quick and clean installation in our 11 rooms.*

*The furniture arrived preassembled, so we had to block our rooms only for the technology integration. And our daily workflow was hardly interrupted, as no dirt and noise causing wall reinforcements were necessary for the furniture.*

*All in all, we are delighted with the overall result and our decision!”*

**Anja Baumann**

Office Support Manager Region Nord, EY Hamburg

Holzmedia

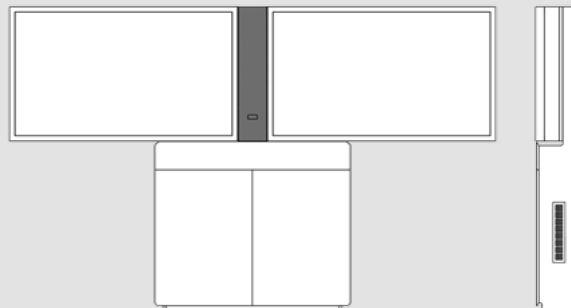

# EY-standard media columns. Developed by professionals, produced by Holzmedia.

## Advantages and use

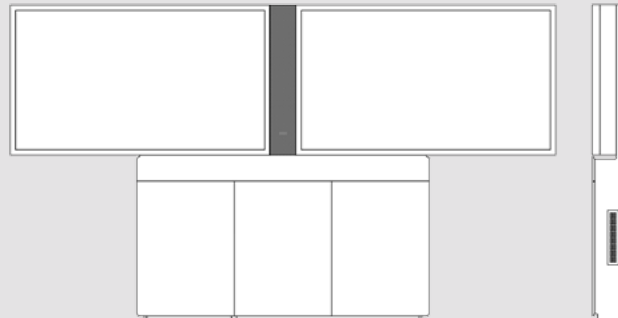

- Perfect functionality regarding technology integration. Invisible, lockable, easy access
- Sober and timeless design – available in different colors
- Load transfer of the heavy displays via the furniture ⇒ no cumbersome wall reinforcement causing dirt or involving additional trades
- Perfectly prepared and coordinated installation by a partner
- Short blocking of rooms for installation
- No complex coordination with individual solutions from providers without specific expertise ⇒ great savings of time and money at the location
- Optimum workflow and planning reliability and adherence to schedule during project implementation

EY Zurich – with 4 rooms and 5 media columns.

Media column EY-W8M2 – with 2 x 65" displays  
(also available as freestanding with floor plate)

Media column EY-W8L2 – with 2 x 84" displays

EY Hamburg with 11 rooms with „VC-standard“.
