

Holzmedia @ TK Elevator test tower Rottweil

Reference report 1 – 2026
Technology industry

New horizons –
Holzmedia media furniture in Germany's
highest conference rooms

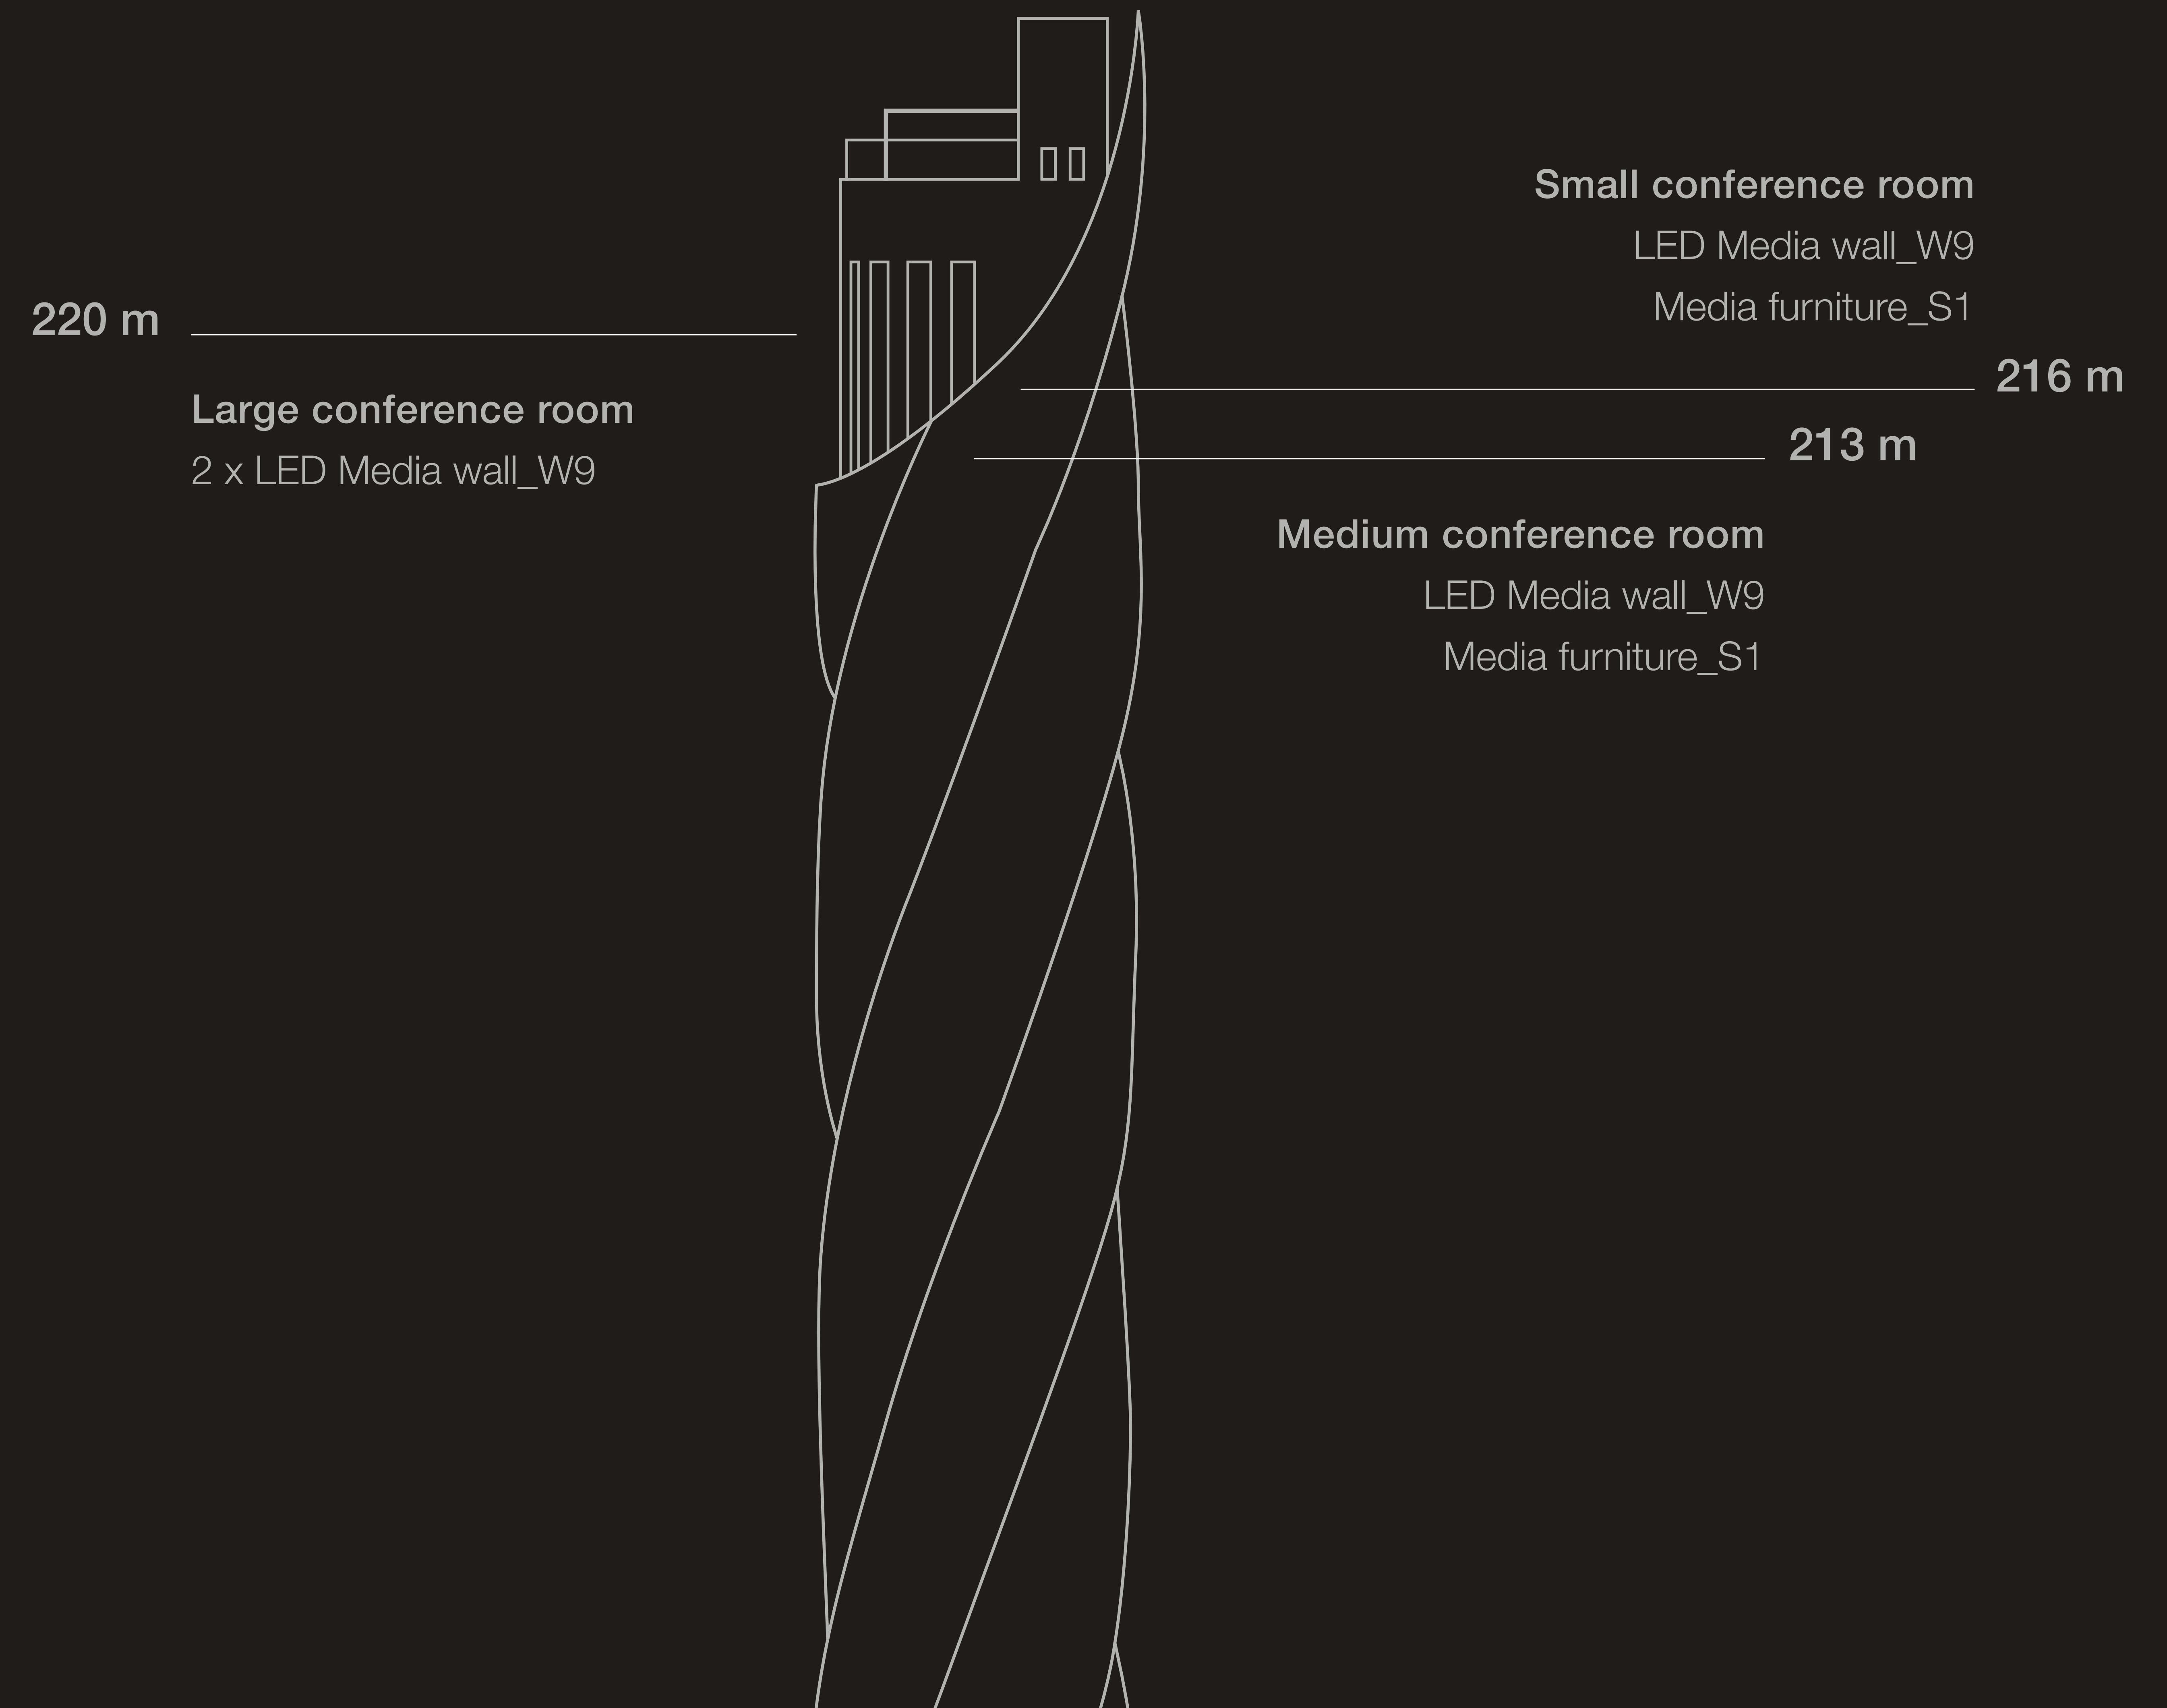

Space for innovation and transformation

Background and objectives

As part of the redesign of the conference and event rooms in the Test Tower Rottweil of TK Elevator AG, the existing usage concept was to be refined in order to consistently align with future requirements.

The aim was to create extraordinary spaces offering maximum flexibility while setting new standards in aesthetics and functionality with state-of-the-art presentation and media furniture.

WHERE TWO...

**Large conference room
Level: 220 meters**

Two mobile W9 media walls give this remarkable room the necessary flexibility for daily use as well as for long-term room planning – innovative media furniture of excellent quality for unique event spaces.

...BECOME ONE.

Viewing events and screenings

The two mobile media walls permit the implementation of diverse room concepts – quickly and flexibly.

Unique appearance paired with foresight – the W9 combines aesthetics and functionality at the highest level

Precisely integrated LED screens.
Lockable doors and well-ventilated
storage space behind the cabinets.

Elegant back panel with handles and a
mobile base plate for flexible positioning
within the room.

“Premium quality and outstanding functionality”

“Based on our positive experiences, we once again opted for media furniture from Holzmedia when redesigning our event spaces. Firstly, because of its premium quality. But above all, due to its outstanding functionality regarding the truly mobile usability of the large LED walls.

And we are extremely satisfied with the result of our decision and the related investment”.

Beate Höhnle

Testtower Manager - Testtower Rottweil
